

**TOWN OF TIVERTON
DEPARTMENT OF PUBLIC WORKS
LANDFILL REGULATIONS REGARDING
CONSTRUCTION MATERIAL**

Code of Ordinances

Sec. 66-1 Definitions.

Construction debris shall mean all waste building materials, resulting from construction, remodeling, repair or demolition operations.

(This shall include but not be limited to lumber, sheet rock, tile, windows, doors, shingles, insulation, carpeting, pipes, fencing, bricks, concrete, fiberglass sinks/tubs, etc.)

Sec. 66-56 Bulky waste, white goods and construction debris pickup.

One bag of construction debris (of a capacity not to exceed 30 gallons and 40 pounds when loaded) may be placed at curbside each week for collection with the regular trash.

Sec. 66-79

(i) No construction demolition material may be deposited at the landfill except for the small amounts that may be contained in the residential trash as collected by the Town's contractor.

Residents who have large quantities of construction waste may want, or need to look for other alternatives to dispose of their material. Below is a list of alternative solutions found in the Verizon Super Pages, found under GARBAGE.
